

## Philosophy, Mission & Vision

By encouraging a love and respect of God, of self and of all life, Queen of Peace Elementary School strives to instill in our students a love of learning and the understanding that all education is a lifelong process. We promote spiritual and academic challenges to support the growth and formation of our students.

As we enter the 21st century, Queen of Peace provides our youth with the quality education in a safe, secure, value-rich Catholic environment. We strive to enable our students to become upright citizens who will embrace our multicultural diversity and celebrate each person in their differences.

Queen of Peace Elementary School will continue to be a leading Catholic education community of faith and knowledge that empowers our students to develop an understanding and appreciation of our multicultural society. We will continue to provide opportunities to establish a technological proficiency in all our students.

### Students are expected to:

- **Respect ourselves and others**
- **Tell the truth**
- **Choose the difficult right over the easy wrong**
- **Accept responsibility for our actions and our words**
- **Show a positive attitude**
- **Be Cooperative**
- **Become more Independent**
- **Practice their spirituality in their daily life**

# ALL EDUCATION IS A LIFE LONG PROCESS

## Subjects taught:

### Language Arts

In grammar, the students identify parts of speech and their usage. Phrases and clauses used in effective writing, punctuation and capitalization are presented and practiced. In writing, students practice the various forms of writing: narrative, descriptive, persuasive, expository and research. Effective oral communication is practiced.

### Literature

Various forms of literature are explored: the novel, short story, poetry, drama, nonfiction and folk tradition. Students are introduced to various techniques which address differentiation of learning styles. Major focus is placed on the study of the novel Treasure Island and To Kill a Mockingbird.

### Math Pre Algebra & Algebra

All students will develop an understanding of algebraic concepts and processes and will use them to represent and analyze relationships among variable quantities and to solve problems. They will develop number and spatial sense, use geometric properties, select and apply various methods of numerical operations.

### Science

The nature of science is that students learn by doing. Learning is an active process in which students construct their own understanding of the natural world and establish connections between science and technology. Our textbook is a 'hands on' book. The curriculum includes: scientific processing, physics, energy transformation, chemistry, life science, body systems, environmental science, earth science and heredity.

### Social Studies

Students master history content, gain an awareness of current events and issues pertinent to a global society. Internet activities supplement differentiated learning techniques in an effort to accommodate all students.

### Religion

Becoming disciples of Christ is the goal of our program. Students examine the Church from her beginning at the Pentecost event through her history. This concept is reinforced through supplemental exploration of feasts, rituals, and doctrine. We practice our faith together at liturgy, devotion to the rosary, commemorating the Stations of the Cross and a variety of prayer services. Family Life study helps us to make correct moral decisions in our lives.
